VITAMIN A

The Retinol is essential to the maintenance and development of dermis connective structure. It stimulates cells regeneration and the synthesis of collagen, playing an important action of preservation of skin turgidity and, in the meantime, an important repairing action towards dehydrated and cracked tissues.

VITAMIN E

Tocopherol, antioxidant, antiradical, protects the lipids of cell membranes attacked by pollution, UV rays, smoke, natural aging of the skin, thus preserving the collagen unchanged, backbone of the dermis. In this way the skin remains toned and elastic preventing the appearance of wrinkles. Its markedly protective action gives it a primary role in the prevention of skin aging.

ALLANTOIN

Fundamental molecule for dermis health. Rich in antioxidant, soothing, moisturizing and repairing substances, it protects the skin from the harmful aggressions of free radicals, preventing their normal skin aging. It deeply nourishes and stimulates its physiological cellular self-regeneration, keeping it so young over time.
