NOCTUR SLIM
Cellulite body cream Nocturshape™, Micropatch® Caffeine, Capsicum

Format 200 ml
Cod. 1010020166

Intensive night cream with lipo reducing and remodeling action. It acts during the night and in the following hours with gradual release, making use of patented specific active ingredients for the cosmetic deep treatment of skin imperfections linked to cellulite and localized fat. It ensures more harmonious shapes and a smooth, toned and elastic skin.
Its effectiveness is guaranteed by the synergistic action of Nocturshape™, counteracting the night accumulation of fat, Micropatch ® Caffeine, molecular patch with controlled and prolonged release of caffeine increasing lipolysis, and Capsicum, stimulating microcirculation and basal metabolism of cells. Shea Butter elasticizes the skin preventing stretch marks, Pure Sweet Almond Oil stimulates the production of collagen and elastin, preserving the structure of the dermis.

NOCTURSHAPE™
Biotechnological active ingredient of marine origin (Plankton) which uses the body's circadian rhythms to counteract nocturnine in adipocytes, a protein involved in adipogenesis and lipid accumulation. During the night our body rests and cellular metabolism slows down just when nocturnine reaches its peak causing a greater accumulation of fat. The Nocturshape ™, by inhibiting the nocturnine activity, reduces localized adiposities with a slimming and smoothing effect of the treated area. It reduces fat nodules typical of cellulite and improves overall skin tone.

MICROPATCH® CAFFEINE
Caffeine is an organic molecule of plant origin that helps burn fat deposits, counteracting the appearance of cellulite. It increases lipolysis and stimulates the mobilization of fatty acids in adipose tissue, making them available as energy for the body, otherwise avoiding that cells degrade causing the appearance of annoying blemishes. Caffeine also has important draining properties, thus avoiding the formation of oedemas, responsible themselves of cellulite's appearance. Essential molecule in the treatment of edematous and fibrous cellulite (cellulite of 1st and 2nd degree). In this special formulation, Caffeine comes in the form of an active molecular patch which, in contact with the skin, allows a gradual and controlled release over time, carrying out its reducing action even in the following hours.

CAPSICUM
Stimulates the microcirculation drawing blood to the skin surface and activates the process of thermogenesis with a consequent increase in the basal metabolic rate of the cells. It thus contributes to the reabsorption of edema and to the reduction of localized fat deposits.

SHEA BUTTER
Particularly rich in vitamins and essential substances for the skin, it has important moisturizing, nourishing and antioxidant functions. It favors the production of collagen giving tone and, thanks to its marked nourishing action, it gives elasticity and is therefore indicated in the treatment of stretch marks and mature skins. It creates a protective film against external aggressions, cold and dehydration.

PURE SWEET ALMOND OIL
Strongly emollient, regenerating and antioxidant, it prevents epidermal dehydration by counteracting any form of flaking. Rich in vitamins, mineral antioxidants and essential fatty acids, it stimulates the production of collagen and elastin, counteracting the loss of elasticity and tone.

DIRECTIONS FOR USE:
Apply the product on the areas to be treated in the evening and massage with circular movements until completely absorbed.
