BODY PEELING CREAM ACID FRUIT
with Microgranules Fruit's acids, Jojoba Oil, Aprikot Kernels, Vitamin E

Format 250 ml
Cod. 1010020067

Body peeling based on Alpha Hydroxy Acids, Jojoba Oil and Apricot Kernels, specific for cleaning and cleansing of the body before treatments. It gently but deeply removes dead cells promoting tissue regeneration while stimulating the production of collagen and elastin in the dermis. Gives the body skin a more toned, uniform and radiant appearance.

FRUIT'S ACIDS: Alpha-hydroxy acids, and other fruit acids, are known for their exfoliating and antioxidant properties. Easily conveyable, they promote the epidermis renewal, stimulate the production of collagen and elastin in the dermis, giving the skin a more toned and compact appearance. On the surface they dissolve the bonds between dead and alive cells, facilitating their removal and giving the skin a more bright and uniform complexion, without epidermal dyschromia.

JOJOBA OIL: Jojoba oil has emollient, moisturizing and protective properties for skin PH. It helps regulate sebaceous secretions and it's also excellent as anti-wrinkles, disinfectant and natural antifungal.

APRICOT KERNELS: The circular fragmentation of the Apricot Kernels stimulates the blood microcirculation, regenerating tissues and promoting interchange between oxygen and waste substances. It rebalances the sebaceous secretion, eliminating blackheads and excess sebum.

VITAMIN E: Tocopherol, antioxidant, anti-radical, protects the lipids of cell membranes attacked by pollution, UV rays, smoke, natural skin aging, thus preserving the collagen, the supporting structure of the dermis, unchanged. The skin remains so toned and elastic preventing the appearance of wrinkles. Its distinctly protective action gives it a role of primary importance in the prevention of skin aging.

DIRECTIONS FOR USE:
Apply the required quantity of product on the skin and vigorously massage. Leave for five minutes. Remove with humid sponges, if necessary.
